

KELLER Pressure Short Portrait

Executive Management

Tobias Keller, Michael Keller

Legal Structure

Privately owned corporation by
Tobias Keller and Michael Keller

Founding year

1974

Workforce

~500 employees

Annual Production

1,3 million pressure measuring cells

Pressure Ranges

5 mbar to 2000 bar

Subsidiaries

Austria, Brazil, Czech Republic, France,
Germany, Italy, Japan, Netherlands, Poland,
Singapore, Spain, Sweden, UK, USA

... and a worldwide network
of sales partners.

Company

KELLER Pressure is known for Swiss quality and precision. Since its establishment, the company has developed and manufactured all its products at its Winterthur facilities.

Local sales engineers are on hand to provide expert advice in your native language, with about 500 employees all around the world helping to make the company a success.

Thanks to extensive technological expertise and more than 50 years of experience, KELLER Pressure consistently delivers tailored solutions for individual applications.

This commitment has positioned KELLER Pressure as the leading manufacturer of pressure transducers and pressure transmitters, certified to ISO 9001 standards.

For People and the Company

As a company, KELLER Pressure has made major contributions to the development of modern pressure measurement technology. The company takes great pride in all its achievements and remains fully committed in its pursuit of making a decisive difference for both its customers and employees in the future. This goal is underpinned by our shared vision and core values: Cooperation, continuous development, mutual support, courage and independence.

Sponsorship

KELLER Pressure is not only involved in the world of pressure measurement systems. For many years, the company has also supported local cultural and sporting events, including being the owner and main sponsor of the Winterthur football club.

Industry Overview

The areas of application for pressure sensors are as varied as the KELLER Pressure product range. They monitor fluid levels, ensure perfectly brewed coffee and assess motor efficiency, to name but a few examples.

Product Overview

As its core business, KELLER Pressure manufactures and sells more than 1,3 million pressure measuring cells annually. With pressure ranges from 5 mbar up to 2000 bar and a wealth of experience, the product portfolio can be used in all manner of applications.

Pressure Transducers

Serie 9L

Encapsulated piezoresistive pressure transducers for absolute and gauge pressure measurement form the core of all KELLER Pressure end-user products. They have proved their worth millions of times over and are a reliable base for any measuring system. Transducers can be adjusted and optimised according to your needs.

Pressure Transmitters

Serie 33X

Pressure transmitters are sensors that use additional electronics to compensate for linearity deviations and temperature errors, outputting measurement results as standardised signals. Every transmitter is measured over the entire pressure and temperature profile and compared to the desired signal span.

Level Probes

Serie 36XW

Submersible probes for level and fill measurement. With a special design and materials including cables and housings chosen for their compatibility with their surroundings, these probes can be used in a wide range of liquids.

Digital Pressure Gauges

LE05

High-quality digital pressure gauges with easy to read displays and practical additional functions. Display units for use with transmitters or for processing standard signals from other sources.

Data Loggers

Serie DCX-22

A variety of data logger designs for recording pressure and temperature profiles. Depending on the system, the data is read out via a plug connection or remote transfer.

Wireless Solutions

21D-RFID

Devices for measuring and transmitting pressure values via wireless interfaces such as LoRa, Bluetooth, 2G, 3G, 4G and RFID. Alarm notifications, switch outputs and additional extras round off the range of functions on offer.

Software

Software and device drivers for configuring the products and for reading, analysing and processing the measurement data.

Accessories

K-114

Additional accessories, interface converters and spare parts for the product portfolio.

Custom Solutions

KELLER Pressure has a strong reputation as an original equipment manufacturer. Both major customers and smaller companies appreciate the wide range of OEM products and customised solutions, which can be easily implemented into their devices.

KELLER

SOLUTIONS FOR YOUR APPLICATION
